Power BI Interactive Dashboard Architecture

Primeor Solutions — Data Analytics Internship | Level 3 Milestone Report

Analyst: Rishi Prajapati | **Tools:** Power BI Desktop / DAX / Power Query | **Dataset:** 51,271 Records

Page 1: Executive KPI Overview

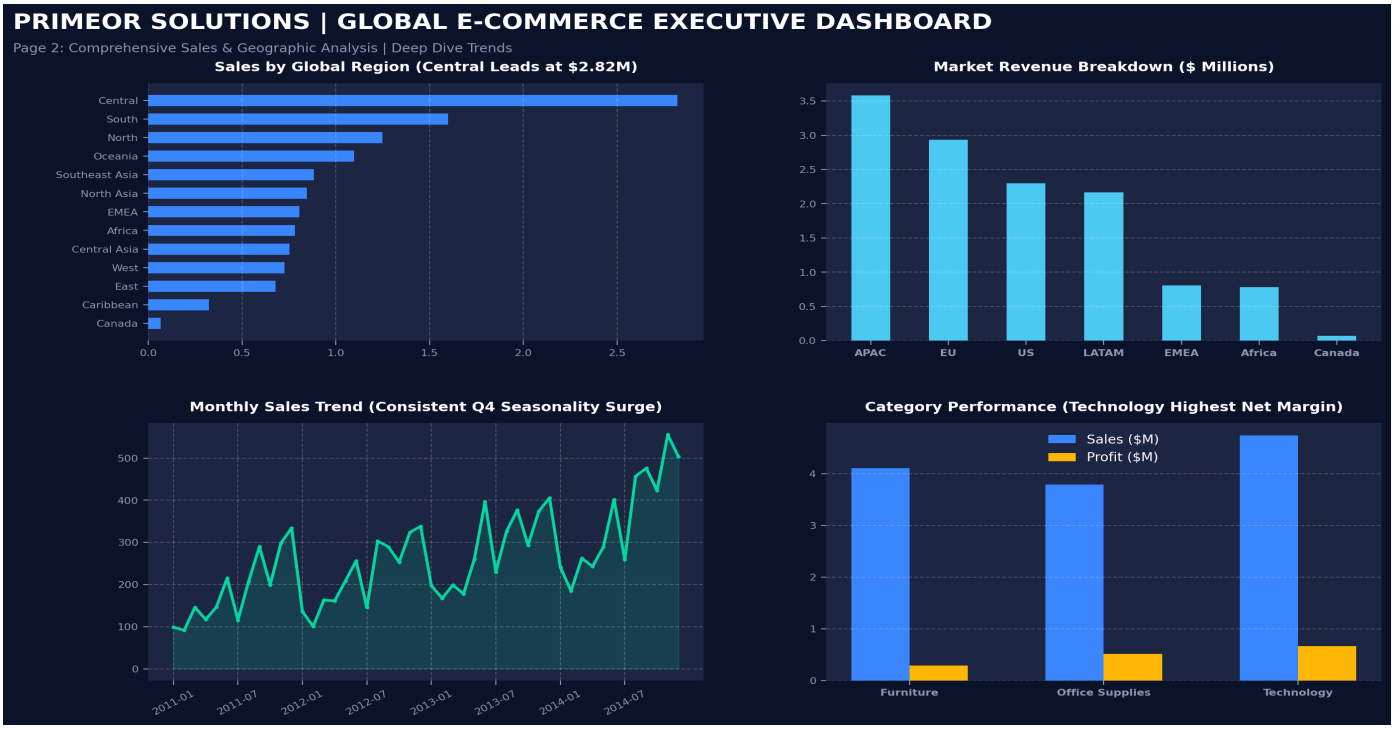

Designed for senior leadership, Page 1 delivers high-level visibility across core metrics: **Total Sales ($12.64M)**, **Total Profit ($1.47M, 11.6% margin)**, **Total Orders (51,271)**, and **Average Discount (14.29%)**. Dynamic slicers allow cross-filtering by Year (2011–2014), Market Region, and Product Category.

Executive KPI	Value	Underlying DAX Formula	Business Interpretation
Total Sales	**$12,635,222.00**	SUM(sales)	Aggregate global gross transactional revenue
Total Profit	**$1,467,721.69**	SUM(profit)	Healthy enterprise-wide net profit margin of 11.62%
Total Orders	**51,271**	DISTINCTCOUNT(order_id)	Total valid commercial transactions processed
Average Discount	**14.29%**	AVERAGE(discount)	Benchmark discount rate across catalog offerings

Page 2: Sales & Geographic Trend Analysis

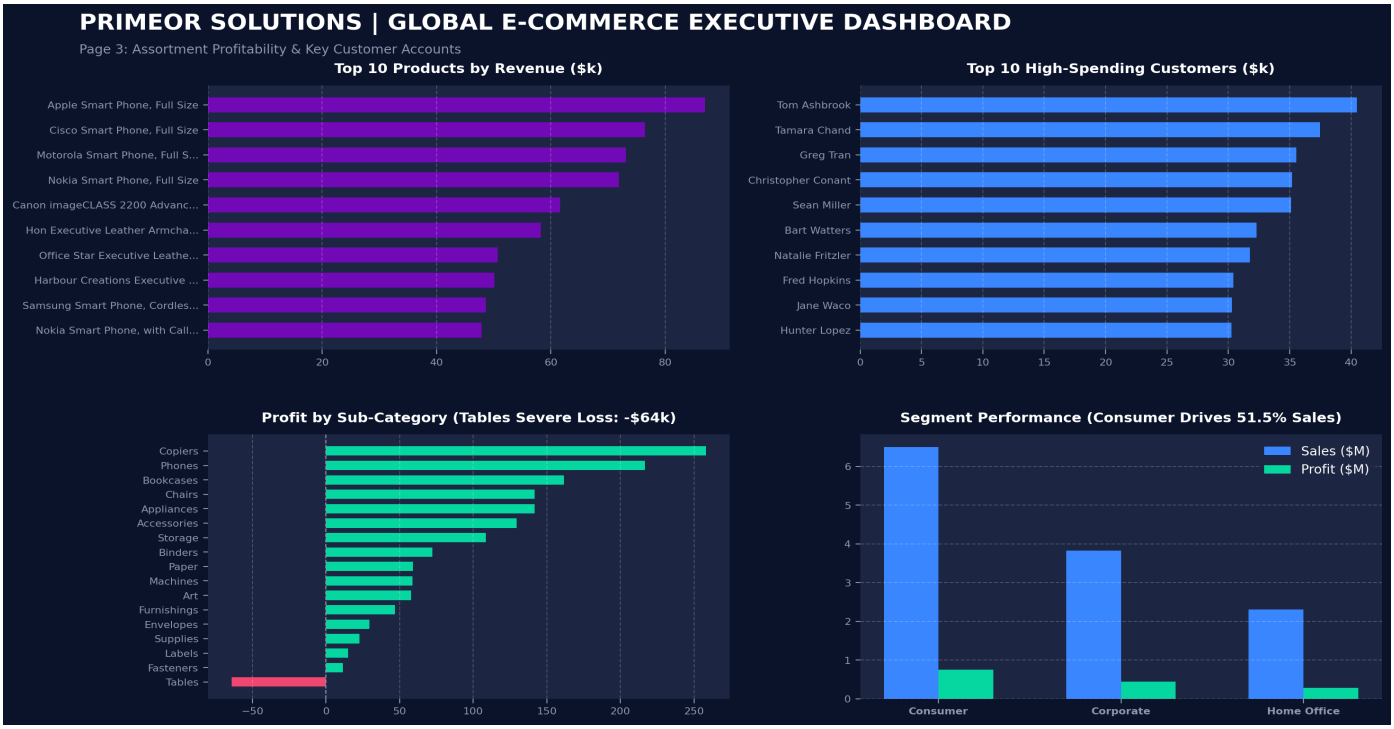

Page 2 enables regional directors to evaluate commercial trends across 13 regions and 7 international markets. The monthly time-series visual highlights recurring Q4 seasonality (September through December peak), while category performance confirms Technology leads net profitability ($663k profit) over Furniture ($286k profit).

Primary Market	Revenue ($M)	Profit ($k)	Margin %	Operational Evaluation
APAC	$3.58M	$437.0k	12.20%	Global revenue leader; core expansion driver
EU	$2.94M	$372.9k	12.70%	High margin stability across Western Europe
US	$2.30M	$286.0k	12.45%	Steady commercial volume in domestic accounts
LATAM	$2.16M	$221.3k	10.23%	Rapid growth with moderate discount dilution

Page 3: Assortment Profitability & Key Customer Accounts

Page 3 equips category managers to pinpoint margin leakages. The diverging sub-category chart reveals that while Copiers ($258k profit) and Phones ($217k profit) drive earnings, Tables incurred severe negative losses of **-$64,113.55**. Top customer analysis highlights high-value accounts alongside margin-diluting buyers requiring commercial contract renegotiation.

Strategic Pillar	Observed Vulnerability	Dashboard Interactive Action
Furniture Margin Repair	Tables sub-category generated -$64,113.55 net loss due to discounts > 35%.	Filter by Furniture > Tables on Page 3 to isolate unprofitable country-level distributor contracts.
High-Value Account Auditing	Customer Sean Miller generated $35k sales but -$397 net loss due to high discounts.	Cross-filter customer accounts on Page 3 to view order-level margin distribution and enforce pricing floors.
Q4 Seasonal Logistics	Sales spike 2.5x from September to December, straining standard fulfillment.	Drill down into Monthly Trend on Page 2 to forecast carrier capacity and prevent expedited shipping surcharges.
